QSL CARDS NOT NEEDED! Date: \_\_\_\_\_ Signature: \_\_\_\_\_

PLEASE SEE PAGE 2 - RULES

## RULES

This award application is valid for contacts made on the Triple H Net starting with January 1, 1989, and requires QSO exchanges with 150 different USA (Continental) prefixes.

In an attempt to make this award more challenging, you must make QSO's with no less than 10 different domestic prefixes in each of the 10 USA Call districts. No Alaska or Hawaii, or any other US possession will count. You may not count any portable or mobile stations worked, but, you yourself could be either (stations working you will not be able to count your station, however). Additionally, you cannot count stations who reside outside their own call district #; ie, **W2LTP** who resides in Delaware (#3) could not be used for the **W2** in his callsign. This award is intended to be a bigger challenge, and to stimulate working new check-in's.

You will need at least 5 Xerox copies of this sheet(or 5 print-outs), with each one being used for two districts. Be careful not to duplicate prefixes! Although you will have to work more than 10 prefixes in a particular call district, you must work a minimum of 10 in each district, for a total of 150 different prefixes.

There are no endorsements available.

**EXAMPLES: W1, WA1, WB1, K1, KA1, KB1, WD1, AA1, N1, NZ1, etc. (1st district)**
